5DT Releases World's First Virtual Reality Continuous Miner Training Simulator

5DT <Fifth Dimension Technologies>, a world pioneer in Virtual Reality [VR] peripherals and training systems, today released the world's first Virtual Reality Continuous Miner Training Simulator. This product, **5DT VR COAL**, is a training simulator Continuous Miner operators.

The simulator offers several benefits and applications.

"The system has been operational at a first site for more than 2 years and to date more than 400 operators have been trained with it. We believe it is now ready for the market. This product could do for underground coal mining what flight simulators did for the aviation industry." said Paul Olckers, President and CEO of 5DT.

One of the most important features of the simulator is that it uses
This product was developed in partnership with SASOL Coal, one of the leading suppliers of coal in South Africa..

5DT is a world leader in the field of Virtual Reality. Based in Silicon Valley, 5DT develops, produces and distributes virtual reality hardware and software systems. 5DT also develops turnkey projects for clients.
